

**You are invited to a Public Information Session  
Regarding the Proposed Development of Hydro-Electric  
Power Projects in the Upper Pitt River Area**

Northwest Cascade Power Ltd., a wholly owned subsidiary of Run of River Power Inc. (ROR) is planning to develop seven run of the river hydro-electric power projects in the Upper Pitt River watershed. ROR has begun the regulatory review process to obtain the necessary permits and approvals for the projects.

The proposed projects will have a combined capacity of 140 MW, providing an important source of clean, 'green' renewable energy. The electricity will be connected to the power grid through one of two transmission routes: one traveling west to connect with the Cheekeye sub-station in Squamish, or the other traveling south to connect with the Port Coquitlam sub-station, in Port Coquitlam. The seven streams are tributaries to the Upper Pitt River, and include Bucklin Creek, Pinecone Creek, Homer Creek, Shale Creek, Steve Creek, Corbold Creek and Boise Creek. The components of each the projects include a high elevation weir and water intake, penstock, powerhouse and transformer.

The Public is invited to attend two public information sessions to review the proposed projects.

The meetings will be held at the following locations:

**In Squamish**

**Totem Hall  
102- 38551 Loggers Lane  
Squamish BC, V8B 0B8  
Phone (604) 689-3119**

**In Pitt Meadows/Maple Ridge**

**Pitt Meadows Public Library  
12047 Harris Road  
Pitt Meadows, BC V3Y 1Z2  
Phone (604) 465-4113**

**December 6, 2006, 4pm-9pm**

**December 7, 2006, 4pm-9pm**

Representatives of ROR will be in attendance to answer questions regarding the project. Public comment sheets will be provided to record issues of concern regarding the project. An electronic comments sheet is provided on the ROR web site at [www.runofriverpower.com](http://www.runofriverpower.com).

To promote public involvement in the process ROR intends to undertake two public information sessions to obtain comments.

1. **The First Public Information Session** (the currently advertised meetings) is intended to provide the Public with an understanding of the project and provide the opportunity for the public to identify and discuss issues of concern.
2. **The Second Public Information Session** is intended to illustrate how Public comments have been considered in the design of the project, and will be undertaken in early 2007.

Additional information about the project is available online at [www.runofriverpower.com](http://www.runofriverpower.com) or by calling Run of River Power Inc. at 604-946-9232.

We look forward to discussing our projects with you.
